ACCESS CONTROL AND ALARM MANAGEMENT

ISS offers a full range of access control solutions to give you peace of mind that your facility and its occupants are safe and secure. With our access control and Alarm Management systems, you can prevent and restrict access to sensitive areas of your facility.

In addition, our solutions are completely scalable from Single Door Access to Complete Enterprise Solutions.

IP VIDEO SURVEILLANCE / VIDEO ANALYTICS

Our IP-based video surveillance solutions are state-of-the-art and are designed to provide maximum SROI (Security Return on Investment). An ISS IP Video solution provides advanced tools that help deter theft, intrusion, vandalism, limit premise liability and capture valuable information about your business. Whether deploying a small single-camera/CCTV system or an enterprise-wide IP-Video solution for a large campus environment, you will receive the same level of customer-care and service.

FIRE LIFE-SAFETY

ISS is a Factory authorized Strategic Partner for Edwards Systems Technology (EST), the market leader in Fire Detection and Life Safety Systems.

As a full-service EST Strategic Partner, ISS has in-house system engineering and CAD departments that design life safety systems to meet the NFPA, AHJ and NEC codes. An ISS Fire/Life-Safety System provides detection and alarm solutions that enable businesses to focus on their core business functions while having peace of mind that their occupants and assets are well-protected.

Whether its and office building, hospital, college campus or stadium, ISS provides innovative ways to meet site-specific challenges and ensures that every project is a success.

MANAGED SERVICES

ISS provides a systematic approach to managing your organization's assets and security budget, ensuring that you maximize your SROI. Managed Services offers a highly affordable solution based on a monthly flat-rate to ensure predictability of costs. Our MSS solutions are designed to serve as a remote extension of your security staff. Our experienced security professionals provide the essential expertise and infrastructure your organization needs.

COMMAND AND CONTROL & PSIM

ISS offers unified Command & Control as well as full PSIM Platforms that are customized to meet both the operational and technical needs of your organization. We can provide a cost-effective, scalable and Intuitive Graphical Interface that drives implementation of your organizations Security Policies and User-Defined responses. Capable of logging all events and activities with both historical data and captured video, our systems can support security management at your critical infrastructure sites while integrating multiple disparate security applications and devices through one comprehensive user interface. Empower your personnel with real-time situational awareness.
